

There are more than six thousand of Woodson's Patent Cook Stove in use in acqua New England, which give universal satis-fastion, and compete successfully with the various hands of Cook Stove to use, not ex-

epting the tatest invented and most puffed.
A lounger for hard or soft confor small of the been recently attached to the to be used in boiling, and also for the balting of small bread, and that, too, with hading of soul Breau, and that, too, who the similar possible consumption of feel, being so arranged as not in the slightest digree to interfere with the other operations of the story. This alone is found to all a the giventages of an ordinary Cook nor Slove, and when in use, does not cause a convenience by giving out heat. emoke or gas.

A volumble improvement in ROA-TING A volumble improvement in Rox-1186, has been suded to this Stave which will ross in at, lowls, &c. in a more potent and satisfactory manner than can be done to any other way, the old fashioned ten foot fire place not excepted. The oven is war-readed superior to that of any other stave in use, the heat around the same being in recess and quickly controlled than in any other stove yet introduced; for such as the ose, an elevated oven is added and so the Stave, being quite accessible and out of the war, and equal to any thing of the kind in use.

The Proprietor wishes it to be distinctly understand that the top of this Stove does not revolve, its construction being such that it is the decided common of those who have had them in use, that the Boilers are at all times in precisely the right place.
There is to this Stove an aparture for

na minerally large Boiler, so arranged that the local is applied to the best possible ad-ventage, off-name a renvenience for heat-ing a large quantity of water or for dairy ing a large distance of water or for dairy ing, successful to any story yet introduced; whether in boiling, laking, or brailing, frying reasting or lossing, they have in-variably proved deserving of the commen-dations bestowed upon them, and it is confidently asserted that no other Cooking Stove in the market can do so much business with so little fuel in any given space of time as Weelson's Improved Patent.

The Top of this Stove being large and of an even surface, with considerable space unoccupied by the boilers, adds greatly to its convenience and value. The construc-tion and operation of this Stove being such tion and operation of this Stove being such as to render the top at all times of a different parts of its surface, as much so that while liquids are being in flit bottom versels upon one part, other parts will be found to vary from boiling drue to blood heat, therefore forming the less possive place to boil coffee, make tea, gravies, &c., and to place cooked desire room, which it is desirable to keep warm parts erved up. Persons who have used this Stave, regard the convenience of the ten es nearly independable. the top or nearly indepensable.

Extract of a letter from the Hon. Charles

Extract of a letter from the Hon. Charles Marsh of Woodstock, Vr. who had one of the Stoves on trul.

We are perfectly satisfied with the operation operar Stove, and think of nothing but retaining it. The construction of it is convenient, the principles are philosophical, and in experiment it is found to answer every reasonable expe-CHAS. MARSH.

Extract of a letter from Stephen P. Breed,

Manufacturer, of Concord, N. H. Mr. Woolson: Str. - I have used in family three or four kads of Cooking Stoves, besides Moon's Patent, and I have taken considerable pains to inform myself on the surject, and the result is, that I con-sider vor "improved Patent" for economy and convenience, superior to any thing I have seen, and I would not part with the one I have for double its cost, if I could obtain another of the Yours, STEPHEN P. BREED.

Bath, Aug. 16, 1833. This may certify that I have one of Woolean's Patent Cooking Stoves in use in my farmy, and I am of opinion, that for economy in fuel, for convenience in use, and for all the purposes for which a Cocking Seeve is required, especially for it surpas any other Cooking or sequented with.

Manufacturer, Bath. N. H.

We, the undersigned, have each of us in use, in the respective families, one of Wustion's Improved Cooking Stoves of the intgest age, and we do hereby certify that it is amply sufficient to do the cooking and other work for a lamily of six'y persons and we think it an arricle of primary impor-tance in a large ter role, benefing home Jona, Buxron, Milford, N. H.

DAVID STEWART, Amherst, Thos. Chase, Nashua,

This is to certify that for two years. I need one of "Woo'son's Patent Cooking Stoves" in my family, at which time I lived in a bruse without fireplaces, or ovens, Opposite R. I.

and the Stove (a No. 3.) performed all the Cooking, Baking, heating of water for washing, &c. for a family of ten persons, and was found amply sufficient for the pur-pose. In my temoval from Windsor to this place. I broke up house keeping, and disposed of my Stave. On re commencing house keeping, the last winter. I was induced, by the strong terms in which they were recommended by the Manufacturers and Tenders, to try a Rodary Top Stove—but after several weeks of fair trial, I was

convinced that it was in no respect equal to "WOOLSON'S PATENT," it was not capable of doing near so much business as Woodison's Store at the same cost, nor of performing what it did do, so well-I had the Rotary taken from my house, and again purchased one of Woolson's Patent, the operation of which on a second trial, only confirmed me in the opinion expressed above. A. W. HATCH: Woodstock, Vt. 1835.

This may certify that within the last three years I have said more than one hundred of Woolson's Patent Cooking

hundred of Woolson's Patent Cooking Stoves, and they have given universal satisfaction to purchasers. John Bryant.

Meriden, N. H., Sopt. 26, 1833.

This may Certify, that we the undersigned, have in use in our respective families. Woolson's Patent Cooking Stove, and it is our fatiowing retracks and certificate may furnish some information respecting the stove, where the same has not been in the content of the cooking Stove is required, especially for baking, it is superfort in any other kind of Cooking Stove with which we are kind of Cooking Stove with which we are

TOPHYSICIANS AND PATIENTS,-TO PHYSICIANS AND PATIENTS.—
The Blind Piles, said to be incurable by external applications.—Solomon Hays war, rants the contrary. His Liniment will cure filind Piles. Facts are more stubborn than theories. He solicits all respectable Physicians to try it upon their patients. It will do them no harm, and it is known that every physician who has had the honesty to make the trial, has candidly admitted that it has succeeded in every case they have known. Then why not use it? It is the recipe of one of their most respectable members, now deceased. Why refuse to use it? Because it is sold as a proprietory medicine? Is this a sufficient excuse for suffering their honest patients to linger in distress? We think not. Physicians shall be convinced that there is no BIA FOR THE HAIR.—Its positive qualities are as follows:

Ist—For infant's keeping the head free from scurf and causing a luxuriant growth of hair.

2d—For ladies after child-birth, restoting the skin to its natural strength and firmness, and preventing the falling out of the hair.

3d—For any person recovering from any debility the same effect is produced.

4th—Hused in infancy till a good growth is started, it may be preserved by attention to the latest period of life.

5th—It frees the head from dandruff, strengthens the roots, imparts health and strength and sufficiency for the hair.
